--- Forwarded by Arthur Block/R2/USEPA/US on 02/22/02 03:57 PM --- Dick/Lou Need to know if EPA is making an official request of ATSDR/NYSDOH for a health consultation on Tutor time. If so, although I could assume which questions you may want answered from us, it would be better if you were to ask them. Example: what are the health threats associated with the indoor air sampling?? Just let us know how you wish to proceed and the questions you need us to answer. Thanks Artie

Dick/Lou On yesterday's conference call EPA requested that ATSDR do a consultation for EPA on Tutor Time Day Care Center. Prior to any follow through need to have some questions answered and make some suggestions to you and Lou.

ATSDR needs to know what specific questions you want us to answer in the health consultation and the time frame for when you need a response. Based on EPA's responses to these questions I can advise EPA on what mechanism ATSDR will use to respond.

As you are aware of, the NYSDOH has been much of the analysis and evaluation, with ATSDR input on the Day Care center. NYSDOH staff will be present at the 13th meeting and will have a site fact sheet available for the public presenting the health messages. If You and Lou are OK with NYSDOH completing a health consultation, given your questions and time frame requirements, then ATSDR would be fine with that arrangement.

Just let us know your questions for the health consultation and your time frame for response and then we will go from there. I will be back in Edison from travel on Thursday afternoon, if this can wait or if not just leave a message on my NYC phone (212-637-4307) and I will get back to you. Thanks Artie
